DETAILED ACTION

The Information Disclosure Statement

The prior art cited in the information disclosure statement filed on August 24, 2004 has been considered.

Additional Prior Art

Fateley et al (US 6,859,275) and Jovin et al (US 6,128,007) disclose spectrally programmable light sources comprising a diffraction grating and a DMA. Attention is directed to Fig. 17 of Fateley et al and the text under the heading "Spectrally Programmable Light Source (PLS)" in columns 9 and 10 of Jovin et al.

Allowable Subject Matter

Claims 1-9 are allowed over the prior art of record.

Examiner's Statement of Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

As to independent claim 1, the prior art of record, taken alone or in combination, fails to disclose or render obvious a hyperspectral scene generator comprising a controller for controllably moving each of the mirrors of the mirror array for selectively reflecting the spectral band directed to the corresponding mirror location, wherein the controller receives scene data representative of a simulated scene having a plurality of scene locations and wherein each of the scene locations includes at least one spectral band at a predetermined power level, wherein the controller generates, based on the scene data, control signals for selectively moving the mirrors of the mirror array such that the mirrors located in a same row of the array selectively reflect the directed spectral bands corresponding to the spectral bands associated with a scene location of the simulated scene, in combination with the rest of the limitations of the claim.

As to independent claim 9, the prior art of record, taken alone or in combination, fails to disclose or render obvious a method of generating a hyperspectral scene comprising the steps of controllably

moving each of the mirrors of the mirror array for selectively reflecting the spectral band directed to the corresponding mirror location, wherein the mirrors of the array are controllably moved to the first and second positions based on scene data representative of a simulation scene having a plurality of scene locations and wherein each of the scene locations includes at least one spectral band at a predetermined power level and projecting the spectral bands reflected by the mirrors in a same row of the array to a predetermined projection location, wherein each of the rows of mirrors in the array corresponds to a different predetermined projection location, in combination with the rest of the limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Fax/Telephone Numbers

Any inquiry concerning this communication or earlier communications from the examiner should be directed to the examiner whose telephone number is (571) 272-2414.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory J. Toatley, Jr. can be reached on (571) 272-2800 ext 77. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
